ALUMINIUM DOORS

BEHIND EVERY DOOR THERE IS A HOME

In response to the ever increasing need for a secure and modern home, our product range includes the HOMEFE panel lined door. These doors are made of modern materials using single and double-sided panel technology.

The frame structure and the door leaf frame are made of a thermally insulated Aliplast Star aluminium. The double perimeter seal system ensures an exceptionally tight seal and offers protection against noise.

In order to minimise heat loss, the 90mm thick panels are filled with polyurethane foam. Selecting a threshold with a thermal break and additional expansion joint protects against frost.

Designed to suit the style and operation of each door, we offer external stainless-steel handles, classic internal handles and three-point hook locks, guaranteed to improve security.

The use of innovative solutions allows for any door configuration, some of which include:

- The multi-point lock (automatic 3-point, with day function and hook-bolts) in combination with three roller hinges, allows maintenance-free operation and guarantees solid and strong anti-burglary protection.
- Internal and concealed door hinge solutions to fit the latest trends in minimalist architecture.
- An internal door closer, positioned inside the door leaf, to compliment modern door designs.
- A fingerprint reader that allows you to use the door without keys.
- An innovative smartphone door operation system.

Exterior Doors

Homeefe

The special offer includes an AN01 inward opening door with a one-sided overlay panel, and:

- 3-point lock
- Double-sided FAM handle on a long plate in the same colour of the door.
- 3 Wala WX double-sided leaf hinges in the same colour as the door

HOMEEFE DOOR AN01

Milling and applications on the exterior of the door

The door in the photo is made in the following colour and doorhandle:

Colour: **RAL 7016**

Doorhandle: **OPW 1400mm**

Identical door design on the outside and inside: included in price

HOMEEFE DOOR AN02

Milling and decorative trim on the exterior of the door only

The door in the photo is made in the following colour and doorhandle:

Colour: **RAL 7016**

Frame colour: **Quartz**

Standard door sizes

Width: from 700mm to 1170mm
Height: from 1900mm to 2460mm

Standard sizes of sidelight

Width: from 300mm to 700mm (side)*
Height: from 1900mm to 2460mm (upper)
Extended door threshold with thermal break: 30mm high

* wider sidelights available on request

! One of the optional external pull handles should be added to calculate the price of the door.

* Time Function - After closing the door in day mode (without turning the key), the vertical levers do not extend. The door can be opened by pulling the handle, as it is only on the latch bolt. The manufacturer recommends using a door closer with these fittings.

Night mode - after closing the door, two levers will drop. Pressing the handle seats the levers. Turning the key locks the handle in a horizontal position (additional parent function).

Standard door equipment

- The FAM INOX 92 handle or doorknob is included as the standard door furniture for both interior and exterior.
- LOB ARES 35 65 insert in brass or nickel, with three keys in combination with a doorknob or handle.
- Automatic lock Autolock AV3 3-point, self-locking (pressing the handle unlocks the door) with a time function *
- Wala hinges come in the colour of the 3-leaf rebate roller door. Additional hinges needed for dimensions greater than 1170 x 2300 mm.
- With the external handrail, the round rosette ACUN062 in the INOX colour is used.
- GALAXY doors are delivered with protective transportation trim

Standard colours:

Standard colours include the entire RAL palette:

RAL, Aliplast IGP palette, Aliplast Tiger palette.

Doors from the GALAXY collection can be made to look like wood. The frame and sash can also be painted in one of the wood effect colours from the Aliplast palette:

Golden Oak, Walnut, Mahogany, Swamp Oak, Pine, Cherry, Winchester, Dark mahogany, Wenge, Siena rosso, Siena pl, Beech.

Other wood-like colours from the Aluproof and Colorex Palette are **on page 10.**

Standard Glazing package:

Package:

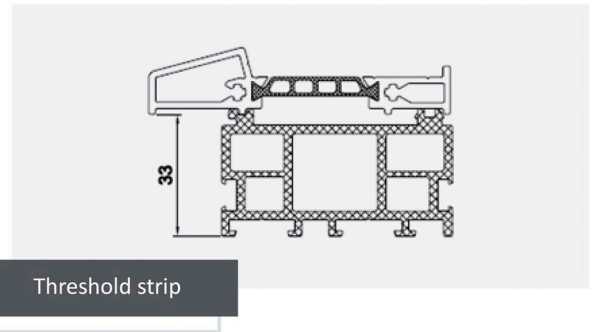

33.1/20/4/20/4/20/33.1

Exterior pane: clear, matte, partly sandblasted, tinted.

6/20/4/20/4/20/33.1

Exterior pane: Venetian mirror

Black thermal inter-pane frames

Standard doors

The door frame is made of Aliplast Star with a depth of 90mm.

The door is fitted with an overlay panel, covered with a 3mm thick cladding sheet on the outside, 2mm on the inside and filled with PUR foam.

Decorative trim and glass frames are made of 1mm thick stainless steel. They can be glued onto the surface of the panels or fitted flush, giving a smooth door surface. Some models are milled to a depth of about 1.2mm.

Two filling variants

DOUBLE-SIDED OVERLAY

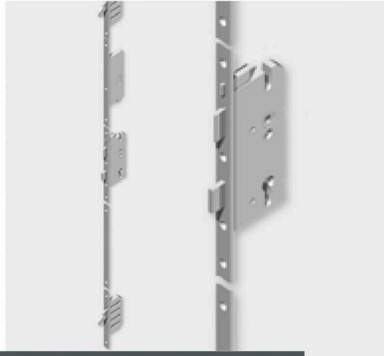

The leaf surface is flush with the frame surface on both sides. A high-quality decorative panel covers the leaf from the outside and the inside, thanks to which a smooth surface on both sides is created without structural joints showing.

ONE-SIDED OVERLAY

The surface of the leaf is flush with the frame on one side (thickness: 59mm.) High quality decorative panel is used to cover the door leaf from the outside, and the internal filling is integrated into the door leaf. From the inside, there is a visible difference between the door profile and the filled surface.

EXTERIOR DOORS – HOMEEFE

Optional equipment

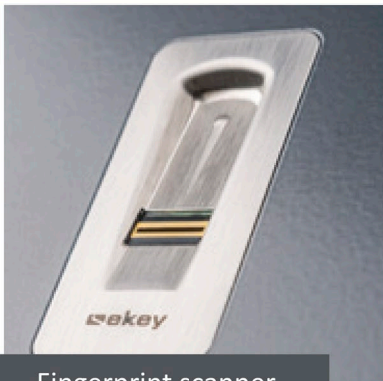

Espagnolette EAV Bluematic

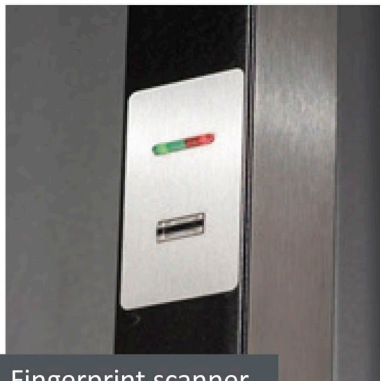

Fail secure Electric lock

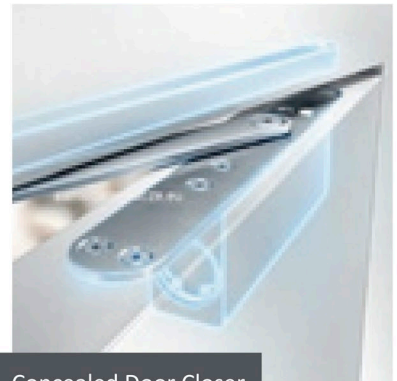

Bluetooth reader

Fingerprint scanner

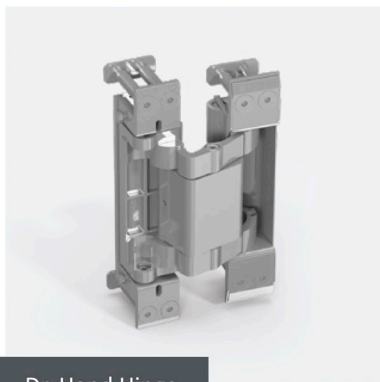

Fingerprint scanner
Idencom Cmos

Concealed Door Closer
Geze Boxer S.Z.

Dr. Hand Covered hinge

Dr. Hand Hinge

Threshold widening

EAV Bluematic electromagnetic lock

Electronic access control systems are required for the use of a Winkhaus Bluematic electric lock. Instructions for attaching the espagnolette are included in the package along with the door accessories.

The power supply for the button is supplied from the lead to the frame via a Winkhaus quick connector. The wiring is attached at the height of the lock on the hinge side.

CLOSING THE DOOR FROM THE OUTSIDE

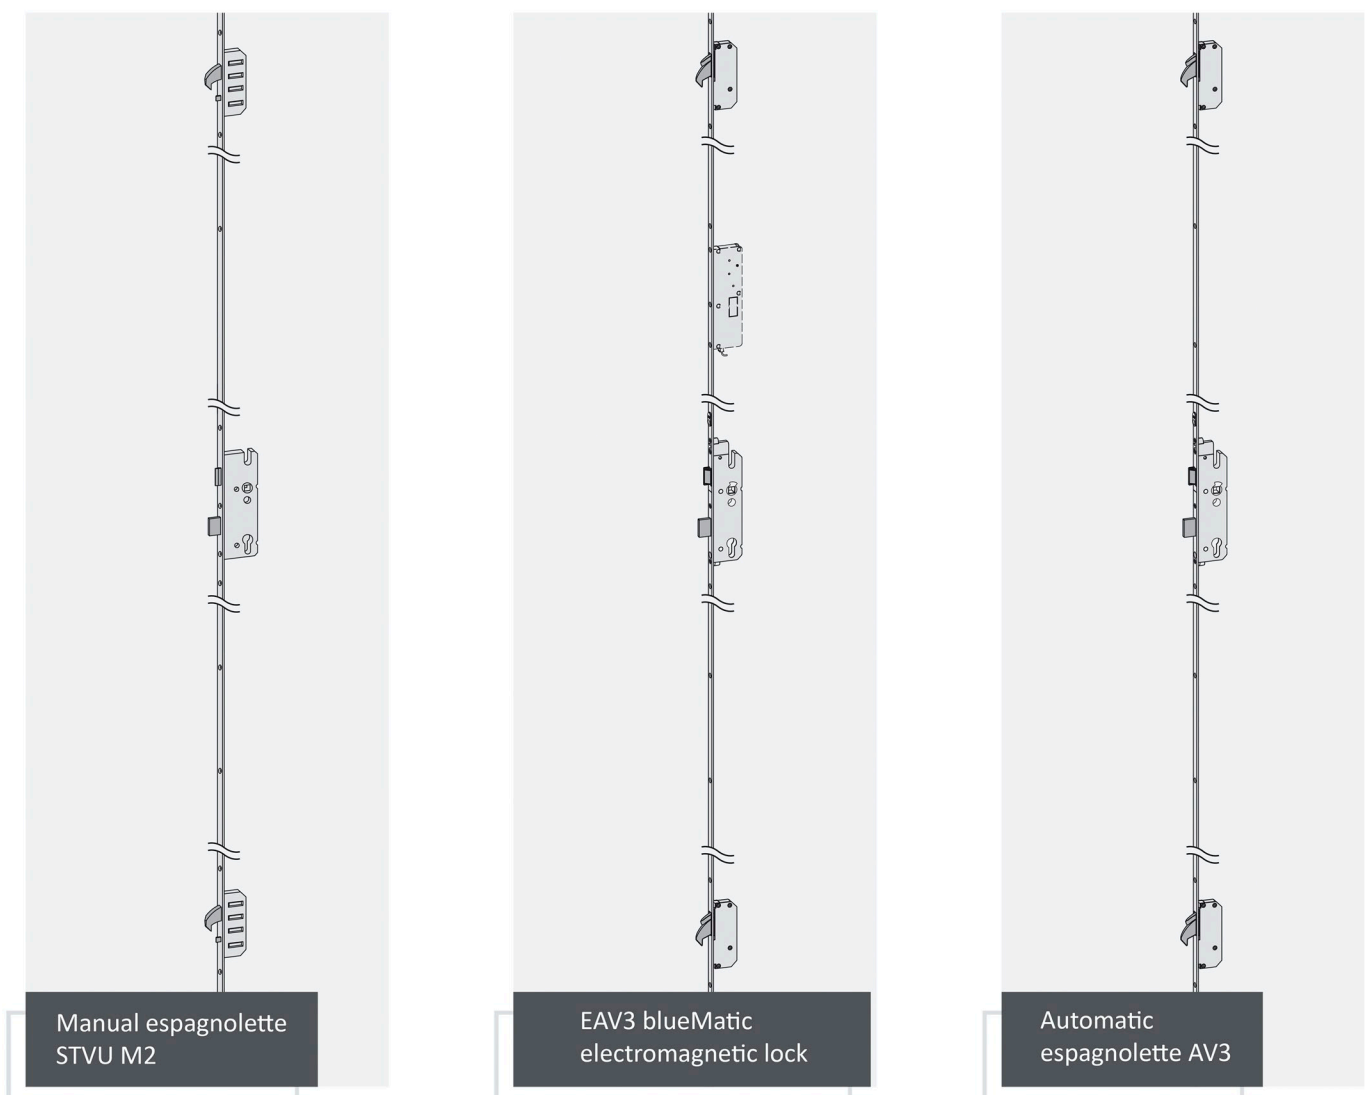

- When the door is closed, two bolts and a latch in the main lock box lock the door

- Additional security is guaranteed by manual locking through one full turn of the key (1x360°), during which the bolt in the main lock case is extended.

OPENING THE DOOR FROM THE OUTSIDE

- The door is unlocked with a key or a connected access control system (e.g., fingerprint reader, coded keypad)

Opening the door from the inside is via a button, an intercom (potential free contact), a handle or a key (also possible in the event of power failure.)

Fail secure electric Lock

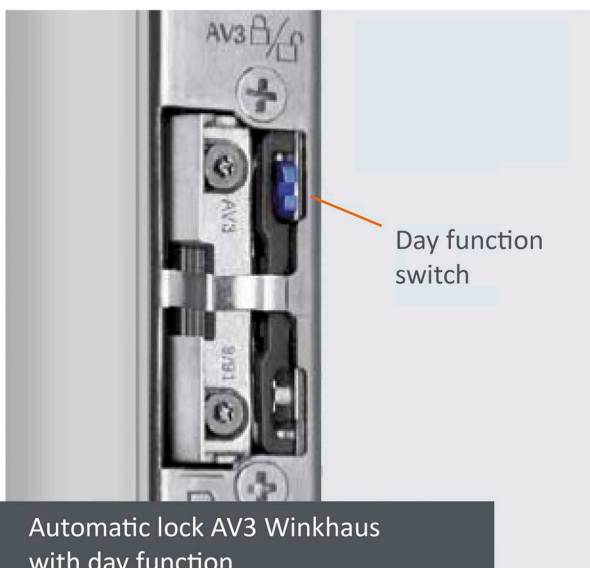

This lock requires an electronic control (e.g. a button in a holder or panel, a coded key pad, an RFID card reader or an intercom). The electric lock with day function requires a safe connection to a 24V power supply. The power cord on the lock side is 2000mm in length. The electric lock includes a 24V power supply only when used in conjunction with a pull handle button. The wiring is attached to the side, at lock height.

Electric Locks

AV3 LOCKS

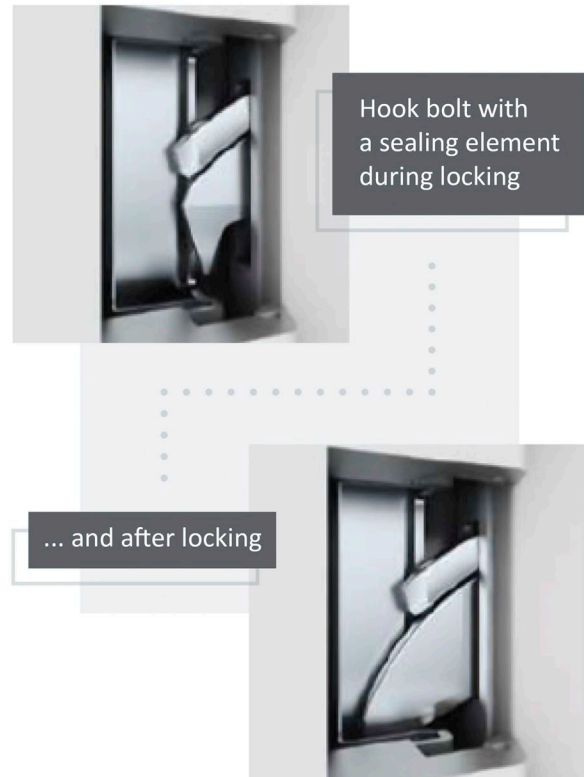

The AV3 locks are available in both mechanical and electric Bluematic EZV3 models.

The electric lock is a comfortable solution that enables automatic locking and remote unlocking (with the use of a remote control, transponder, mobile phone, fingerprint reader, etc.) From inside, the door is opened traditionally- with a door handle.

AV3 WINKHAUS AUTOMATIC LOCKS

Automatic AV3 locks have an innovative, two-piece bolt system with a specially designed sealing element. This sealing element works independently of the bolts and maintains sufficient pressure between the door and the frame. It ensures that the door always fits tightly and correctly to the frame.

AUTOMATIC LOCKS AV3 WINKHAUS WITH DAY FUNCTION

Thanks to the day function, the door can be opened from the outside without a key.

This is a practical solution, particularly for situations such as: unpacking groceries from the car, momentarily going out to the garden or easily allowing children to gain access after returning from school.

Door threshold extension

Extension of the width of the 1200mm threshold (visible part of the extension is reduced by 10mm in height - also known as the groove). The extensions are connected lengthwise only and are delivered pre-assembled.

Door Threshold extension (the given height includes a 10mm groove)	Price
Height: 70 mm	£ 50
Height: 80 mm	£ 55
Height: 90 mm	£ 60
Height: 100 mm	£ 65
Height: 120 mm	£ 70
Height: 150 mm	£ 75

Electronic access control	Price
EAV Bluematic electromagnetic lock with an electric cassette (this requires an additional control option)	£ 720
With Bluetooth reader+ EAV Bluematic espagnolette Glass structure equipped with a keypad - compatible with electromechanical locks and electric bolts, supports up to 6 mobile phones and 18 user codes simultaneously, secure bluetooth technology with a touch option.	£ 1640
With Indecom Cmos fingerprint reader +EAV Bluematic espagnolette The security system is installed in a 40x40 or (2)40 handle or in a panel and is compatible with electromechanical locks. This system provides the highest level of tamper protection, reader decline errors are almost impossible and the structure is made of high-quality steel. Please note, this can't be used with a round door handle.	£ 1795
With Ekey Fingerprint reader +EAV Bluematic espagnolette Installed in a 40x40 or (2)30 handrail or a panel, compatible with electromechanical locks. This system consists of a fingerprint reader and a control unit, which functions by comparing fingerprint readings with the data stored in its memory.	£ 2460
With BioKey Idencom coded keyboard + EAV Bluematic espagnolette The keypad casing is made of stainless steel and the molded keypad cover is compatible with electromechanical locks - this is an intelligent tamper-proof lock.	£ 1900
Preparation of the grip for the microswitch Installed on a 40x40 or Ø 40 pull handle (control for the 12/24V 'fail secure' electric lock with boxed, mounted power supply).	£ 100
