TRANSFORM YOUR HOME WITH STYLE, SECURITY AND EFFICIENCY

Investing in new windows can completely transform your home, bringing in more natural light, enhancing security, improving energy efficiency, and elevating its overall appearance. Our wide range of windows offer the perfect solution, whether you're refreshing an existing space or designing something brand new.

Our collection offers a wide variety of window styles to complement your home and lifestyle, including classic casements, elegant bay and bow designs, versatile tilt and turn options, and practical fully reversible windows.

For heritage and period properties, our flush sash casement and vertical sliding sash windows are the perfect choice, combining traditional character with the benefits of modern performance to beautifully restore your homes original charm.

LIFESTYLE WINDOWS

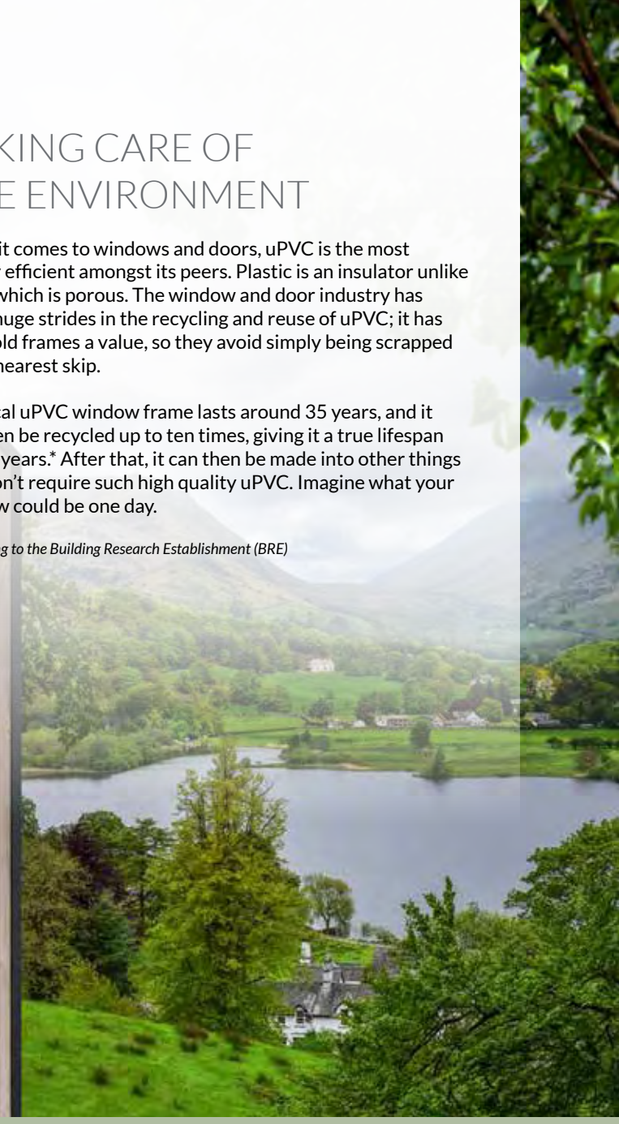
Curvaceous, CONTEMPORARY & ELEGANT

CHOOSE THE FRAME THAT'S RIGHT FOR YOU

The Lifestyle Range of windows are available in a choice of bevelled, sculptured or flush options.

Bevelled frames offer a more contemporary look with angular, clean lines while the sculptured frame option is softer, rounded and more ornate. A flush frame offers a sleek look and can be the perfect addition to a traditional or contemporary house.

All frames offer different aesthetics but the same superb security features, energy efficiency and range of finishes and colours.



TAKING CARE OF THE ENVIRONMENT

When it comes to windows and doors, uPVC is the most energy efficient amongst its peers. Plastic is an insulator unlike wood which is porous. The window and door industry has made huge strides in the recycling and reuse of uPVC; it has given old frames a value, so they avoid simply being scrapped in the nearest skip.

A typical uPVC window frame lasts around 35 years, and it can then be recycled up to ten times, giving it a true lifespan of 350 years.* After that, it can then be made into other things that don't require such high quality uPVC. Imagine what your window could be one day.

**According to the Building Research Establishment (BRE)*

ENJOY THE BENEFITS...

Our Lifestyle Range offers the perfect balance of aesthetically pleasing windows with the modern benefits you'd expect from uPVC. Designed to keep you safe and warm, you can find your perfect finish thanks to the range of colours available.

- Virtually-maintenance free, our windows don't require time-consuming sanding or painting, which means you can spend more time doing the things you love.
- The multi-chambered construction of our windows gives added strength and improved thermal efficiency.
- Fully-integrated, slimline weather sealing maximises glazed area while eliminating draughts for a warmer home.
- A more energy efficient home - our windows achieve up to A++ WER (Window Energy Rating).
- For enhanced security and peace of mind manufactured to PAS24 with an optional upgrade to Secured by Design* **manufactured under licence by Glazerite*
- 70mm profile, designed to replace existing frames for minimal trimming or finishing during installation.

A classic touch

CASEMENT WINDOWS

With their elegant design, flexibility, and outstanding thermal and security performance, it's no surprise that casement windows remain a favourite choice for British homeowners. Whether opting for a single sash or multiple sashes to fill a larger opening, each window can be tailored to your preferences, with openers positioned on one side, both sides, at the top, or across the entire frame to deliver the perfect level of ventilation.

Our casement windows are available in three distinct frame styles, sculptured for a classic finish, bevelled for a clean, contemporary edge, or flush for a sleek, timber-look design where the sash sits level with the frame.

We also offer French windows, which open outwards from the centre with no fixed mullion, creating a wide, unobstructed view and allowing more fresh air and natural light into your home.

French Window Options

As with French doors, the vertical centre piece of the window is not fixed and fully open, often favoured by building control when the fire escape is a concern.

BAYS AND BOWS

Claystone flush Bay window

Anthracite Grey flush Bay window

DISTINCTIVE & *beautiful*

Bays and Bows add a prestigious touch to any home.

While Bay windows allow for a larger internal space, bow windows can certainly create the illusion. Both styles allow natural light to flood in making the room feel brighter and more spacious.

Bay windows give a classic appearance and create greater space, looking elegant inside and out. With numerous opening casement window options, ventilation can be easily controlled by opening them individually.

As it extends outwards, the bow window gives the illusion of space and can completely transform the look of your property. Bow windows can also be tailored to suit your needs, giving you the option to choose which panes should remain fixed, and which can allow for opening.

TILT AND TURN

Tilt and Turn windows strike the perfect balance between good ventilation and easy cleaning.

A safe, secure and stylish option for any type of home, these windows open in two ways. One turn of the handle allows you to tilt the window inwards from the top to let the fresh air in, while the effortless rotation mechanism gives you the option to open the window fully for more air, or to easily clean the panes, inside and out.

Sleek and contemporary aesthetics are combined with weather resistance and a high security specification. For homeowners looking for extra safety features, these windows can be fitted as Tilt- or Turn-only if required on installation.

With one handle for locking, opening and tilting, it is simple and easy to operate. Our Tilt and Turn windows are available in a choice of bevelled or sculptured systems and a number of glazing options and foiled colours. Available in locking and non locking for added safety.

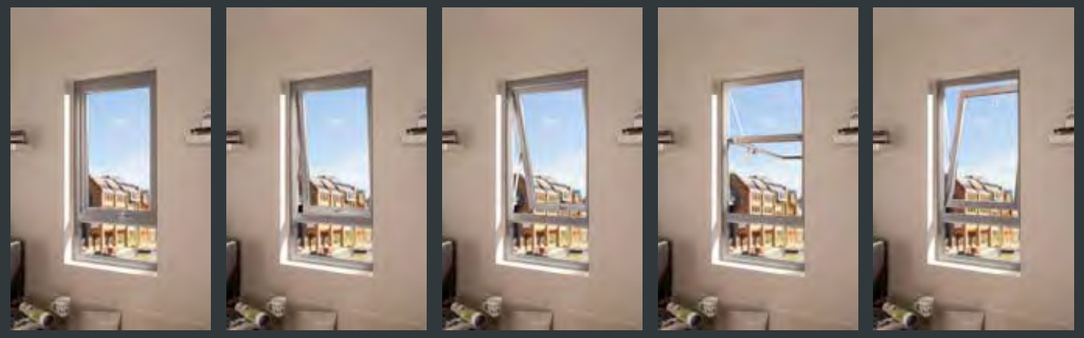
FULLY REVERSIBLE WINDOWS

INSIDE OUT *outside in...*

Fully Reversible windows are among the latest in uPVC product innovation, designed specifically for high rise living or hard-to-reach areas of the home where windows cannot be cleaned externally.

The 180 degree reversible function means the outside pane can be easily accessed for cleaning, simply by turning it from the inside. Better still, it operates without even entering the home so you can clean without fuss and you won't have to remove any ornaments or picture frames from your window cill.

Simple to operate and aesthetically-pleasing, it also provides a range of ventilation options. For added safety, fully reversible windows have flexible locking positions and optional restrictors.



Enjoy the full advantage of your reversible windows as they shield you from external noise and fill your home with fresh air and sunlight.

VERTICAL SLIDING SASH WINDOWS

Charm, CHARACTER & PERFORMANCE

A timeless feature of British architecture, our precision-engineered uPVC vertical sliders are designed to perfectly blend heritage charm with modern performance. With a mechanical joint (butt joint) and authentic details such as traditional sash horns, deep bottom rail, and realistic woodgrain finishes, they capture the look of classic timber sash windows without the upkeep.

Smooth, reliable operation is built in, with sashes that glide effortlessly and allow flexible ventilation by opening the top, bottom, or both. For added convenience, the innovative tilt-in function makes cleaning the exterior panes simple and safe from inside your home. Whether you're renovating a period property or enhancing a new build, VEKA Vertical Sliders deliver the perfect combination of elegance, practicality, and modern efficiency.

- Multi-chamber profile for great thermal and sound insulation.
- Available in a range of colours - including different colour on the outside to the interior.
- Heritage style hardware.
- Triple glazing option.
- Sculptured internal beading.
- Locking options including upgrade to Secured by Design standards.
- Available mechanically jointed.

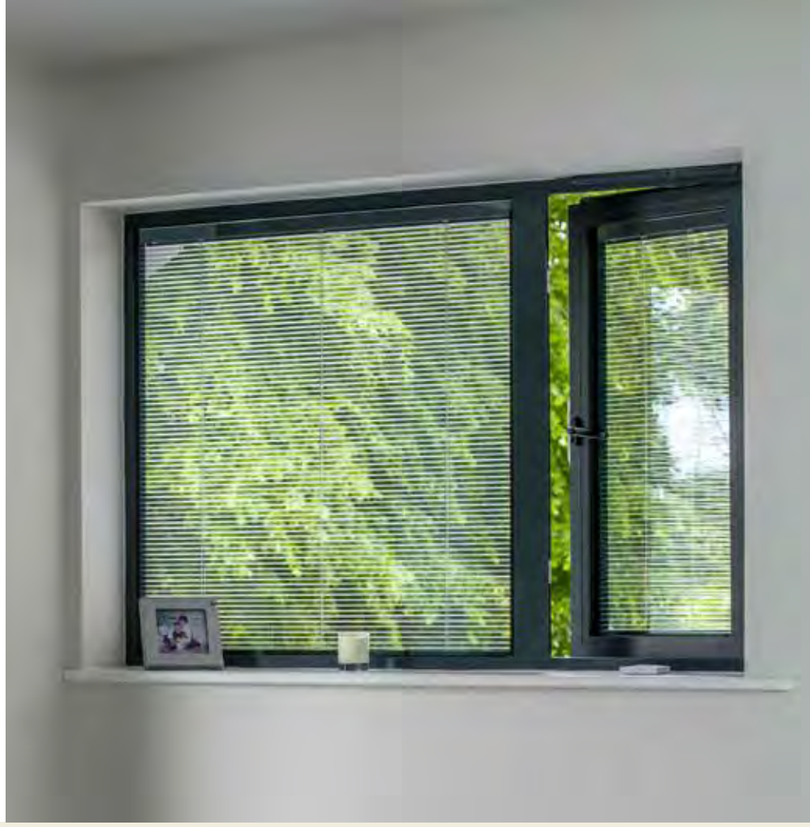
MAKING YOUR HOME *energy efficient*

The Lifestyle Range of windows is available in a choice of glazing options and glass types, including decorative, textured and privacy options.

All of our windows are designed to keep you warm, and can be designed to achieve a DER A rating with a double glazed unit and standard outer frame**.** Products are assessed under an energy rating scheme that grades them from A++ to E. This rating considers the entire product - including both the frame and the glass - measuring heat loss, draught prevention, and solar gain to give a clear indication of how the window or door will perform once installed in your home.

Did you know?

The option to specify triple glazed units offers you even greater energy efficiency and can help save you money on your heating bills.



INTEGRAL BLINDS

A modern and contemporary product that can be used in both windows and doors, with no hassle or fuss. Enjoy sleek style, privacy and easy cleaning with blinds built into the glass - no dusting, no tangles, just beautiful control of light and shade.

With smooth, cordless operation and a sleek finish that complements any interior, they're a perfect fit for busy households, open-plan extensions, and modern bifold doors. Choose from a range of colours to match your windows and enjoy peace of mind with a child-safe, low-maintenance shading solution.

THE *perfect* COMPLEMENT

Your windows are only as good as the hardware and fittings supplied with them, which is why we only work with leading suppliers, to guarantee a long lasting product that performs while looking great throughout its lifetime.

Operated by an easy push-to-open button, our handles are as durable as they are appealing in a range of great colour options.

For Tilt & Turn-style casement windows installed above ground level, the handle has been designed to restrict full opening without a key for additional safety.

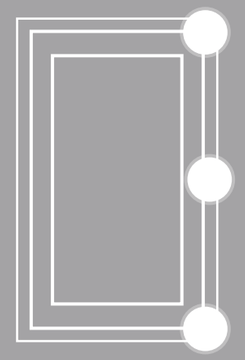
SAFE AND SECURE

HIGH SECURITY

21st century living requires reassuring security features. Our windows feature one of the most advanced shootbolt locking mechanisms on the market today, and are built to exceed stringent PAS24 requirements, with a range of 4-6 locking points and a night-vent position to secure your home against forced entry.

ADDITIONAL SECURITY

Hinge Protectors provide extra security, and if forced, the hinges have more protection. The shootbolt is complemented with bi-parting mushroom cams which lock the centre of the window, and resist attempts to jemmy it open.



MULTI-POINT PROTECTION

Multi-point protection secures the windows firmly in their frames with the option to upgrade the locking system to meet Secured by Design standards if required.

COMPLETE PEACE OF MIND

For enhanced security and extra peace of mind, the coveted and police-led Secured by Design standard can be easily achieved across the entire casement range with a few minor upgrades.

Simply ask for Secured by Design Specification on your order and we will make the changes.

Our products are manufactured under licence by Glazerite UK Group Ltd.
